DESIGN CONCRETE SYSTEMS LTD.

DESIGN : FOR **EXTRA STRENGTH**

- 6,000PSI high-strength concrete designed to withstand freeze/thaw cycles
- Strong, stable units weighing 5,500 lbs. each
- Gravity walls up to 12 ft. high without need for costly geo-grid or tie-backs
- Manufactured in a CSA-certified facility

DESIGN : FOR **COST SAVINGS**

- **Larger Size** ▶▶ Install 24 sq. ft. per swing, using your own equipment and minimal labour
- **Hollow Construction** ▶▶ Units weigh only 5,500 lbs. (230 lbs./sq.ft.), maximizing freight savings
▶▶ Drainage system integrated into the wall
- **Self-aligning** ▶▶ Each layer 'locks' into the one below, ensuring secure, precise layout
